SOURCE:

1. An urgent production matter in the Werk fuer Fernmeldewesen HF, Berlin - Oberschoeneweide, concerns the tube "ECH 81", now in the research department. Information is that this is an ultra-shortwave receiver with a metal tube. Production of the tools necessary for this tube was rushed so that the research could be carried out as quickly as possible.
2. The tubes, "PL 81" and "PL 83", are still being experimented with. As the reason for the long-continued studies, it is said that the electrical rating of the experimental tubes is not up to requirements.
